## *Welcome Message*

Greetings from the Garden City, Bengaluru!

There have been several exciting advances in the field of pediatric stroke. Uniform national guidelines on evaluation and management of pediatric stroke are currently not available in India, unlike in other nations & seem to be the need of the hour, in order to salvage the young brains at risk. This obviously calls for raising awareness on the diagnostic approach & available recent therapeutic advances in pediatric stroke, including hyperacute stroke therapies, and promoting team work amongst medical personnel involved in caring for kids with pediatric stroke - the neurologists, pediatric neurologists, stroke specialists, Neurointerventionist, intensivists, pediatricians & the therapists involved in stroke rehabilitation. With this goal in mind, we are delighted to host the second national pediatric stroke conclave 2024 at Bengaluru. A galaxy of eminent speakers, well known in the field of pediatric stroke, will be speaking on practically important aspects of pediatric stroke. The program will feature expert lectures, case based interactive discussions & will cover a wide variety of topics ranging from basic to advanced pediatric stroke care useful for all practicing medical personnel interested in pediatric stroke care. We look forward to welcoming you to this academic feast.
